Gate 14 — repeated world strikes: 10x the stale actions, no measurable success cost
A. The manipulation is real
H=1 (replans every step)
H=10 (commits 10 actions)
stale actions executed
(actions run against an already-moved world)

B. Effort: not separable from noise
Welch, disturb vs control:
object p=0.52 · spatial p=0.34
success identical (Fisher p=1.0)
H=1
H=10
step cost of the strikes
(disturb − control, steps)
